

Synergy. Solution. Partner.

KÜNNE Group.

We produce high-quality wires in dimensions and surfaces conform to the market. Our comprehensive storage capacities always guarantee the demanded volumes and qualities within the required delivery times for our international customers. The ambition to be a part of a functioning value added chain as well as striving for the highest customer satisfaction are some of our principles.

The KÜNNE Group administration in a traditional building and the highly modern production in Hemer.

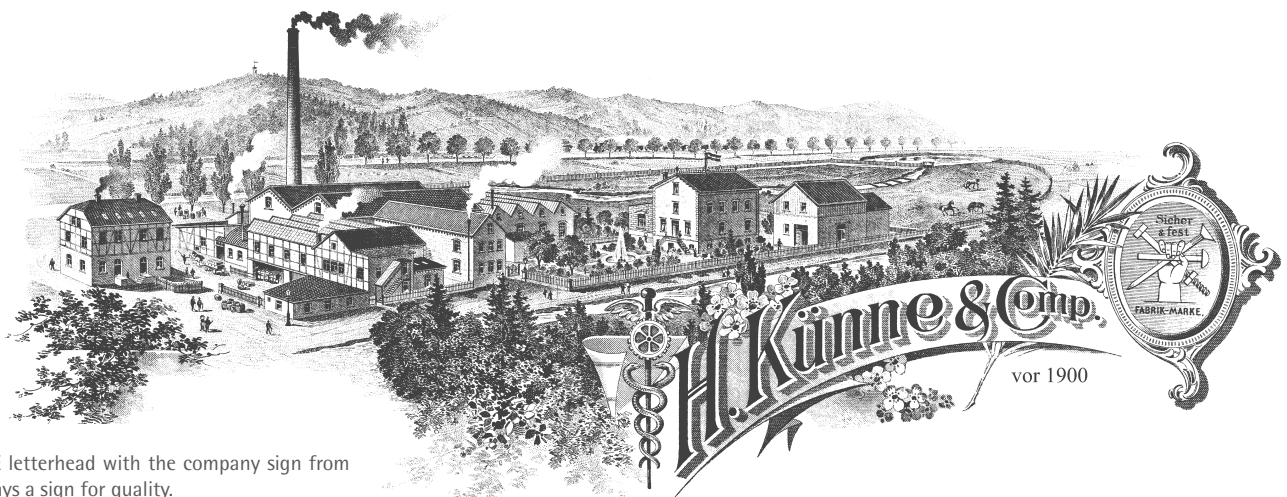

Experience and Innovation.

The companies of KÜNNE Group are unified by a joint demand: the highest-efficiency production of a high-value quality wire. KÜNNE, headquartered in Hemer, and its subsidiaries are located in the region of origin of the German wire industry, in Southern Westphalia. In the environment of the infrastructures that have grown with suppliers, service providers and processors, long-term trusting cooperations have developed, which allow us to react promptly and more flexible to our customers' requests.

Since its founding more than 300 years ago, the owners have continually expanded the company and supplied more and more new markets. The medium-sized business KÜNNE thus became an important partner for international customers in all areas of wire production and processing.

The integration of other companies and the consequently foundation of the KÜNNE Group are further steps to expand our competences as well as our range. The resulting synergies and advantages for customers of KÜNNE Group result in even more intense partnership, stronger integration in overall processes and more customer satisfaction. These are our primary objectives and incitements. Our customers' success is our own success. That is the reason why the market will beacon significantly the thoughts and actions of our employees in all companies of KÜNNE Group.

The KÜNNE letterhead with the company sign from 1873: always a sign for quality.

The KÜNNE Companies.

H. KÜNNE STAHL DRAHTWERK

KÜNNE GROUP

Our Promise.

The compliance with the high-quality standards is placed first for all companies of the KÜNNE Group. A promise we make and renew every day to ourselves and our customers. Therefore it is taken for granted that we are ISO-certified:

Efficiency and Safety.

The principles of KÜNNE Group define standards, which are set from our international customers, their markets as well as our own demands.

In order to achieve this objectives entirely, we place reliance upon technical innovation, personnel continuity, permanent customer service and distinct market integration. We support and motivate our employees in the demand to improve permanently and also striving for knowledge and perfection.

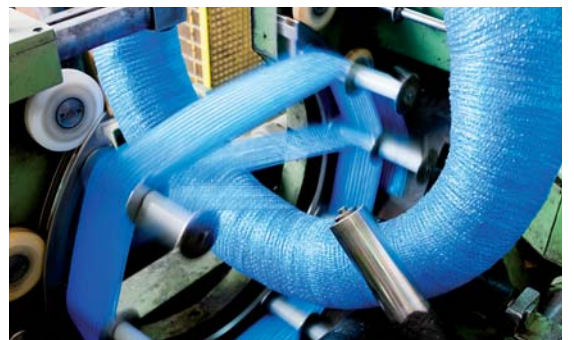

This way we are able to arouse strong innovative power which runs through all business areas and from which our customers, suppliers and employees can benefit.

Our shared objective is not short-term profit optimization but long-term consideration of all relevant factors. Notwithstanding all economic efficiency, KÜNNE Group has the principle of ecological sustainability and therefore long-term securing of our locations, our living environment and also our future.

Our employees know how to handle wire. From preciseness receipt inspection of raw material via certified production through to secure and timely transport, all processes are based on experience and competence.

The Warranty.

Packages to individual customer wishes: From the smallest plastic coil to large Z-2/Z-3-coils, classic former to coils packed for sea freight, for overseas transport, we deliver wire just as you demand it.

Claim and Quality

Product quality is not a special feature today, but a matter of course. Highest and continuous product quality is always the result of many intermeshed processes. Comprehensive understanding of this claim also includes aspects like delivery capacity with very short deadlines and in small quantities, continuous presence, comprehensive production know-how, customer-oriented delivery packaging and – last but not least – conditions conform to the market.

Our continuous process controls as well as our individual customer support guarantee this quality. Controlled purchase of material, efficient production processes, customer-related storage capacities, market-oriented range of goods, in short: everything you expect from your partner is part of the KÜNNE Group company standards.

Furthermore we claim to be better, than we are expected to be.

Production-accompanying quality inspections in our own test lab. Torsion, tensile strength, compression and bending resistance are inspected in every process stage with computer-aided material tests.

Cooperation.

From coils to drawing plants and storing place to shipping. We leave nothing to chance. The planned and computer-controlled processes interlock seamlessly and ensure highest efficiency in all process stages.

Our quality claim is very high even when purchasing raw materials. Here the optimal conditions for efficient and sustainable production start.

Promise and Diversity.

The market position and success of our customers also depend on the reliability of our suppliers. Therefore the scale for our capacities, logistic plans and organization always have to guarantee the security of support of our customers.

Our certified work processes, continuous quality inspections and synergies within the group create a secure basis for this. Our large storage capacity, which permits our customers access to all common product qualities and dimensions at all times, processing-friendly packages to meet nearly any customer request as well as our efficient loading stations that adjust to your vehicles are part of efficient overall planning.

Planning you can put into practice successfully.

Our consignment stock is also ready for delivery at all times, receiving our customers and forwarders with perfectly prepared delivery batches.

Even our level-controllable loading station adjusts to our customers. This guarantees safety and efficiency.

Partnership.

Contact and Dialogue.

It is a pleasure for us to be available for you at any time. For all required information please have a look at our homepage.

We are looking forward to hearing from you soon.
